USE OF "COOKIES"

Cookies are small text files, given ID tags that are stored on your computer's browser directory or program data subfolders. Cookies are created when you use your browser to visit a website that uses cookies to keep track of your movements within the site, help you resume where you left off, remember your registered login, theme selection, preferences, and other customization functions. The website stores a corresponding file (with same ID tag) to the one they set in your browser and in this file they can track and keep information on your movements within the site and any information you may have voluntarily given while visiting the website, such as email address.

Cookies are often indispensable for websites that have huge databases, need logins, have customizable themes, other advanced features. Cookies usually don't contain much information except for the URL of the website that created the cookie, the duration of the cookie's abilities and effects, and a random number. Due to the little amount of information a cookie contains, it usually cannot be used to reveal your identity or personally identifying information.

There are two types of cookies: session cookies and persistent cookies. Session cookies are created temporarily in your browser's subfolder while you are visiting a website. Once you leave the site, the session cookie is deleted. On the other hand, persistent cookie files remain in your browser's subfolder and are activated again once you visit the website that created that particular cookie. A persistent cookie remains in the browser's subfolder for the duration period set within the cookie's file. Scope Markets' websites use cookies to provide the functionality you need to browse our sites correctly.

Our websites, and all its sub digital assets, mobile app and the landing page use cookies to distinguish you from other users of our websites. We do not use cookies to personally collect information about you – the cookies that we use only collect anonymous information to optimize our services and do not collect personal information.

PROTECTING YOUR DATA

We are aware of the requirement to ensure your data is protected against accidental loss, disclosure, destruction and or abuse. We have implemented appropriate technical and organizational measures and processes to guard against such breaches. Such measures and safeguards may include encryption during information transmission and storage, strong authentication mechanisms and the segmentation of digital architecture to zones that are policed and protected. We have implemented a strategy of ‘least possible access’ and periodically review existing access. While such systems and procedures significantly reduce the risk of security breaches and the inappropriate use of personal information, they do not provide absolute security. We will regularly review our security posture with reference to the latest standards to effectively eliminate the likelihood of any form of misuse.

In the event that this Privacy Policy materially changes, including how we collect, process or use your Personal Information, the Company will notify you about any material changes by placing a notice on its website or by communicating with you directly.
